Home - NUM
NUM CNC systems traditionally have an open and powerful software that adapts to the respective needs of the machines to be automated. The adaptability is not limited to the PLC programs or HMI adjustments. Specific functions can, for example, also be integrated to the real-time system of the CNC control.

Drives - NUM
I've looked at a couple of forums that popped up when I googled the alarm number but haven't had much success with the suggestions. I was curious though, if when sending programs with the Fanuc if the end of block symbol (;) needs to be at the end of each line in the nc file? or is the control supposed to format the program correctly?
