### **Electrical - Sprinter Adventure Van**

For older Mercedes Sprinters (Pre-2006) without air conditioning, the recirculated air function is controlled by pressing the heater distribution rotary knob on the dashboard. This in turn lights a red light in the centre of the control knob to indicate recirculation is selected. Pushing the control again will turn it off.

...

Criteria for the installation spot are where you want the cold air in your van and what else you plan (or already have) on your roof. Since the AC was the first thing I put on the roof of my Sprinter I could play around with multiple layouts but the final decision was to put the opening for the roof pretty close to the middle of the rear section.
