causes acid rain).

Biosolar cells: moving forward step by step | Bio Based Press

The Biosolar Cells Project Through biosolar cells, researchers try to improve photosynthesis, the process through which plants, algae and some bacteria capture sunlight. The product of such 'artificial leaves' is hydrogen for instance, that can be processed to fuels and chemicals, with CO₂ and nitrogen.

The Biosolar Cells Project

BioSolar is currently preparing commercial grade prototype battery cells to demonstrate the benefits of its Performance Boosting Additives in a complete silicon anode lithium-ion battery. Commercial partners working on this project include Ferroglobe PLC, one of the world's largest suppliers of raw silicon materials, and Top Battery, a South Korean manufacturer of EV batteries.
