Candelilla Wax. For a plant-based and allergy-free wax emulsifier, there's candelilla wax. It comes from the wild Mexican candelilla plant, which forms the wax on the outside of its leaves to protect it from water loss. While most waxes are best suited for lighter formulations, candelilla works well in thicker, heavier, water-in-oil formulations.

For Use In
Emulsions To
Impart Water

(using with non-ionic emulsifiers) or by an electrostatic mechanism (using ionic emulsifiers, most often anionics). Combining anionic and non-ionic emulsifiers gives the emulsion an optimum stability because wax particles are protected through both stabilization mechanisms, referred to as the electro-steric stabilization mechanism.
